

Study Timer

User can set a timer and choose break intervals for studying.

- Entry boxes allows for hour, minute, and second keyboard input
- Scales to the right of each entry box can be used to adjust time up to a maximum of 23 HRS 59 MINS 59 SECS
- Radio buttons allow for pre-determined break intervals or none at all
- If user checks the custom break check box radio buttons will be disabled and spinbox value will be used as break interval
- Start button starts the timer
- Quit button quits the program
- Pause button will pop up a message box allowing user to pause timer until OK is pressed
